

EDMON [Last Name]

Founder & Technical Product Builder — Tech / Software

[City], Kenya | [your.email@example.com] | [+254 7XX XXX XXX] | [linkedin.com/in/yourprofile] | [portfolio/GitHub link]

PROFILE

Kenya-based founder and technical builder with a track record of scoping, designing, and shipping multiple consumer tech products from concept to prototype — spanning fintech, agritech, and wellness tech. Comfortable owning the full product lifecycle: writing PRDs, architecting systems, integrating third-party APIs (payments, identity, data), directing development, and preparing investor-facing materials. Known for a highly directive, iterative build style — turning ambiguous ideas into structured specs and working software.

EXPERIENCE

Founder & Technical Lead — Dart Technologies

Kenya | [Start Year] – Present

Founded and lead a portfolio of Kenya-native technology ventures, personally scoping product requirements, technical architecture, and go-to-market positioning for each.

Soko (Cashi) — Social Micro-Investing App

- Designed and specified a Kenya-native social micro-investing platform on React Native (Expo) with a Firebase backend and Zustand for state management
- Architected secure M-Pesa Daraja payment integration routed exclusively through Cloud Functions, keeping payment logic off the client
- Directed integration of Smile ID for KYC and the Mansa API for NSE / African market data
- Specified “Cashi,” an in-app AI investing advisor powered by the Claude API
- Established the “Forest & Gold” design system and produced sequential AI-agent build prompts, a QA audit prompt, and a feature-verification prompt to direct development

AgriMarket Kenya — Agricultural Marketplace & Price Intelligence

- Authored a full PRD covering a produce marketplace, real-time price intelligence, a mutual deal-locking flow, farm-gate lending, and parametric weather insurance
- Built the MVP on a Next.js monorepo (Vercel) with a vanilla HTML/CSS/JS frontend and Firebase backend; designed M-Pesa Daraja STK Push and B2C payout flows with idempotent callback handling
- Explored a CBK Digital Credit Provider licensing path and structured a parametric weather insurance partnership model
- Produced investor pitch materials grounded in real Kenyan agricultural data (KNBS, KAMIS); secured a KES 5,000,000 seed ask and advanced partnership talks with NCPB Bondo

Dishi — Food Delivery App

- Scoped MVP architecture for customer and rider apps (React Native / Expo) and a restaurant portal (Next.js) on a Firebase Firestore backend
- Defined brand and UI system, including a custom color palette and interaction constraints

FamilyNest — Family Operating System App

- Completed a full PRD and interactive prototype for a family coordination platform covering an AI advisor, a finance hub, and a legacy/will planning module
- Established a flat, solid-color forest-green design system on a Firebase backend

MindCare — Wellness Tech Platform

- Built and positioned a Kenya-native wellness tech platform; produced a competitive positioning map to sharpen market differentiation
- Won a hackathon with this product concept

Independent Research — Fintech & Regulatory Landscape

- Researched Kenyan financial and tech legislation, producing structured reference guides covering banking, fintech, data, and technology Acts
- Mapped gaps in Africa's fintech landscape across credit infrastructure, cross-border rails, agrifintech, and wealthtech to inform product strategy
- Built an African financial markets analysis application

SKILLS

Languages / Frameworks	JavaScript/TypeScript, React Native (Expo), Next.js, HTML/CSS
Backend / Infra	Firebase (Firestore, Cloud Functions), Vercel
Integrations	M-Pesa Daraja API, Smile ID (KYC), Claude API, third-party market data APIs
Product	PRD authoring, product scoping, system architecture, pitch deck design
Other (placeholder)	[Add: e.g. Python, SQL, Git, Figma, Agile/Scrum]

EDUCATION

[Degree] — [Field of Study]

[University / Institution Name], [City] | [Graduation Year]

ADDITIONAL

Represented ventures at innovation and hackathon events, including pitching AgriMarket Kenya at Campus Spark (Kisii University). Originally from Siaya County, Western Kenya.
